CAREER OBJECTIVE

Motivated and detail-oriented fresher seeking a Full Stack Java Developer position to leverage my strong foundation in Java, HTML, CSS, and JavaScript. Eager to contribute to innovative projects and collaborate with cross-functional teams to create efficient and user-friendly applications. Committed to continuous learning and growth in the fast-paced tech environment, with a passion for developing robust solutions that enhance user experience and drive business success.

SKILLS

- Java, JavaScript, HTML, CSS
- Linux OS
- Oracle SQL, MySQL
- Express js, Node js, Hibernate, Spring boot
- Agile Development

PROJECTS

Offline Study Web App

- Developed an Offline Study Web App utilizing **HTML**, **CSS**, and **JavaScript** for the frontend, complemented by **Java** and **Gradle** for the **Android** backend. This application allows users to access study materials without an internet connection, enhancing the learning experience. Implemented responsive design for cross-device compatibility and utilized Java for backend logic, ensuring efficient data handling and offline capabilities. The project showcases my proficiency in full-stack development and my ability to create user-friendly educational tools.

Medical Store Management System

- Developed a comprehensive Medical Store Management System using **Java** and **MySQL** for backend database management. This application streamlines inventory management, sales tracking, and customer relationship management for medical stores. Key features include user authentication, real-time inventory updates, and sales reporting, ensuring efficient operations and improved customer service. Leveraged Java's object-oriented programming principles to create a robust and scalable system, demonstrating my skills in software development and database integration.
